Managed Hosting Overview

A Total Peace of Mind

While running a business, it is comforting to know that your infrastructure is in safe hands. Volico's managed hosting services and packages offer peace of mind. Your mission critical infrastructure is looked after 24/7 in a maximum security environment. Volico facilities are of the highest standard – monitored around the clock to ensure the availability of your infrastructure. Volico simplifies security for your organization by managing it for you. We investigate your current level of protection and help you find any areas that are putting your information or systems at risk.

Managed Backups

Volico backup solutions will ensure that customer data is backed up and protected. Our team of specialists will manage everything from Hardware and system failures, human error and virus infection to the backup process itself.

Monitoring Services

We offer a full detailed comprehensive view of every aspect of your network and IT environment. From Port Monitoring to Application, and Database Monitoring. Volico's Monitoring Services allows your business track down failures, security breaches, and inefficiencies in your platform.

Managed Firewall & Unified Threat Management (UTM)

Volico's Managed Firewall Services give you the benefit of having our security experts manage your firewall and intrusion detection. Your data is protected against service interruptions, because security is one of our core focuses when hosting your servers.

Business Continuity

With Volico's Cloud Infrastructure, you can scale your applications, allowing you to start small and grow as needed. Volico's cloud computing services are broken down into two basic types: load balancing and fault tolerance clusters.

- Internet Accessible Admin Panel
- Backups, Replication, and DR
- Military Grade 448-bit Encryption
- Unlimited File Based Snapshots
- Scheduled or Continuous Backups

Managed Backups

- Rapid Provisioning
- Dedicated Cisco Certified Engineers
- Effortlessly protect your mission-critical applications and data
- Ensures that critical security functions are being handled by our expert team

Managed Firewall

- Anticipate future requirements
- Increased availability
- Peace of mind
- Proactive monitoring and response
- Monitor Windows, Linux, and Unix
- Port and application monitoring

Monitoring Services

- Private Disaster Recovery suites
- Hardware and connectivity redundancy for 100% up-time
- Offsite storage of backups for disaster recovery purposes
- Backups can be restored to any server in your environment or Volico's cloud
